

$$67x \equiv_3 \underline{-8}$$

$$\text{Resto} = \underline{101, 11, 12}$$

SVLG

$$67 = 3 \cdot 22 + 1$$

$$\underline{-8} = 3 \cdot (-3) + 1$$

$$\rightarrow x \equiv_3 1 = [1 + 3z \mid z \in \mathbb{Z}]$$

$$\text{se } z=5 \quad x=16$$

$$16 \equiv_3 1$$

$$= \frac{67}{3} = 22$$

$$3 \cdot 22 = 66 + 1$$

METODO PER
FAR VENIRE
1.
